Re: Transcontinental Gas Pipe Line Company, LLC  
Proposed Northeast Supply Enhancement Project  
Federal Energy Regulatory Commission (FERC) Docket Number: CP17-101

Dear Community Leader:

Williams owns and operates a natural gas transmission pipeline known as Transcontinental Gas Pipe Line Company, LLC (Transco), which transports natural gas from natural gas production areas to customers such as utility companies and power plants located throughout the northeastern and southeastern United States.

Over the past year, we've held numerous project briefings and public meetings to help educate local leaders and the public about the proposed Northeast supply Enhancement Project (Project). Many of your constituents may have received a letter or been in contact with Williams regarding the Project. This letter is intended to provide additional information about the project and its status.

### Project Scope

The Project is being designed to add 400,000 dekatherms per day of additional natural gas transportation capacity and is targeted to be in service for the winter heating season of 2019.

The Project design has many components including:

- Approximately 10.17 mile, 42-inch loop (Mainline D) in Lancaster County, Pennsylvania
- Compressor Station 200, Chester County, Pennsylvania – Add 21,902 HP by installing one electric motor-driven compressor unit
- New Compressor Station 206, Somerset County, New Jersey – A new 32,000 HP compressor station near Transco's mainline consisting of two Solar Mars 100 compressor units and gas cooling
- Approximately 3.43 mile, 26-inch loop of the existing Lower Bay Lateral from Station 207 downstream to the Morgan M&R, Middlesex County, New Jersey (onshore)
- Approximately 23.5 mile, 26-inch loop of the existing Lower Bay Lateral from the Morgan M&R in Middlesex County, New Jersey to the Rockaway Transfer Point, New York State waters (offshore)

### The Regulatory Process

Transco filed an application for the proposed Project with the Federal Energy Regulatory Commission (FERC) on March 27, 2017. This federal proceeding is referenced as FERC Docket CP17-101. The company is requesting a schedule that would allow all proposed facilities to be placed into service in the second half of 2019. FERC issued its *Notice of Application* on April 6, 2017.

You may begin receiving some information from FERC about the Project. During its review of Transco's application for the proposed pipeline, FERC assesses potential impacts to private property, the environment and communities. Information about the proposed project is available on the company's website at [www.northeastsupplyenhancement.com](http://www.northeastsupplyenhancement.com). Questions and comments pertaining to this project and interstate pipeline facility proceedings may be directed to FERC, Kimberly D. Bose, by mail at 888 First Street, N.E., Washington, DC 20426 or electronically at [www.ferc.gov](http://www.ferc.gov). Be sure to include the docket number, CP17-101 on all correspondence.

Your input is important, and Williams is committed to working with you to ensure that any questions or concerns are promptly addressed. If you have questions about the Project, please call 713/215-2264 or e-mail us at [nese@williams.com](mailto:nese@williams.com). You can find out more about our company by visiting our website at [www.williams.com](http://www.williams.com).

Your cooperation is greatly appreciated. Thank you for your time and consideration in this matter.

Sincerely,

Megan Stafford
