RE: Erosion & Sedimentation Control Plan
White Oak Mainline Expansion Project- Daleville Loop Review II
ESCGP-2 File Number: ESG 00 029 15 0001
Highland and Londonderry Townships, Chester County, PA
Most Recent Plan Revision Date: 12/1/15
Total Acres: 44 Disturbed Acres: 44
Receiving Watershed: Doe Run & Big Elk Creek Designation: TSF & HQ

To Whom It May Concern:

The above referenced project has been reviewed by the Chester County Conservation District and found to be **adequate**. The E&S and PCSM/ Site Restoration Plans adequately addresses erosion and sediment control and meets the minimum requirements of the Department of Environmental Protection's (DEP) rules and regulations, Chapter 102, Erosion and Sediment Control and The Clean Streams law, provided all Best Management Practices (BMPs) are properly implemented and maintained.

No construction or earthmoving activities may commence until all required permits and the ESCGP-2 Permit is issued. The ESCGP-2 permit will be issued by the Chester County Conservation District. You will be contacted by our office to make arrangements to pick up the stamped plans when the ESCGP-2 permit is issued. Our office hours are from 8:00 am to 4:00 pm – Monday through Friday.

The final *stamped and approved* Erosion and Sedimentation Pollution Control (E&SPC) plan and a copy of the ESCGP-2 Permit must be available at the site of the earthmoving activity during construction until the site is permanently stabilized. The Preparedness Prevention and Contingency (PPC) Plans are to be fully implemented and available at the construction site.

The District has reviewed this plan solely to determine whether it is adequate to satisfy the requirements of Chapter 102, Erosion and Sedimentation Control Rules and Regulations of the Pennsylvania Department of Environmental Protection and the requirements of the Department's PCSM rules and regulations. The Chester County Conservation District

assumes no responsibility for the design or implementation of the plans or the proper construction and/or operation and maintenance of the best management practices contained in the plans.

Should any measures proposed in this plan prove incapable of adequately removing sediment from on-site flows prior to discharge or prior to stabilization of the disturbed areas, or if accelerated erosion is caused downstream or downslope from the site, additional measures must be implemented by the developer to eliminate any and all such problems.

The Chester County Conservation District requires notification of at least 7 days prior to the commencement of on-site earthmoving activities for a pre-construction meeting and 72 hours notification prior to the commencement of earthwork and will conduct periodic site inspections to determine compliance with Chapter 102 regulations.

This adequate letter is in effect for the remainder of the ESCGP-2 permit. Any changes, revisions, or modifications to the approved plans will need to be resubmitted to the Chester County Conservation District for review and approval prior to the beginning of construction.

Questions regarding this matter can be directed to:

Joe Sofranko
Resource Conservationist
Chester County Conservation District
